National Digital Infrastructure - Network NA & RHC's

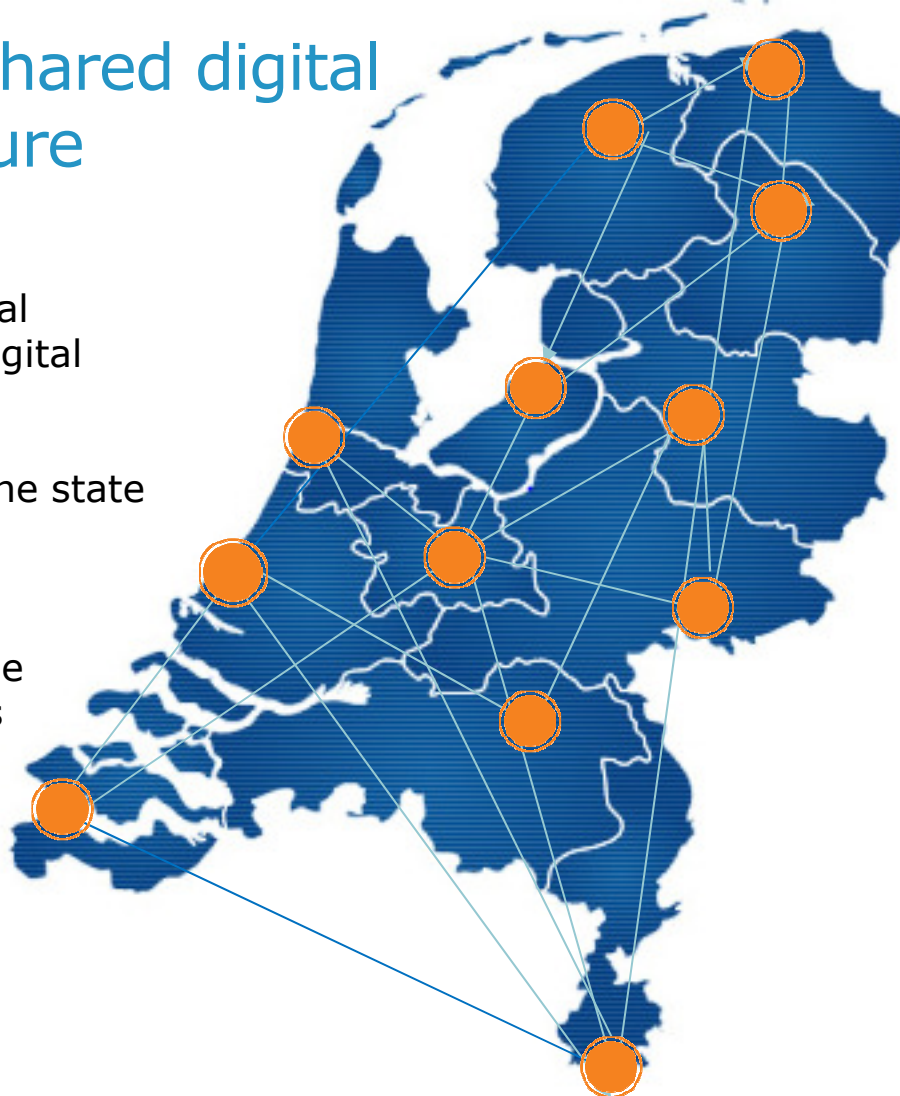

e-Depot: shared digital infrastructure

NA & RHC's
build shared digital
infrastructure / digital
repository

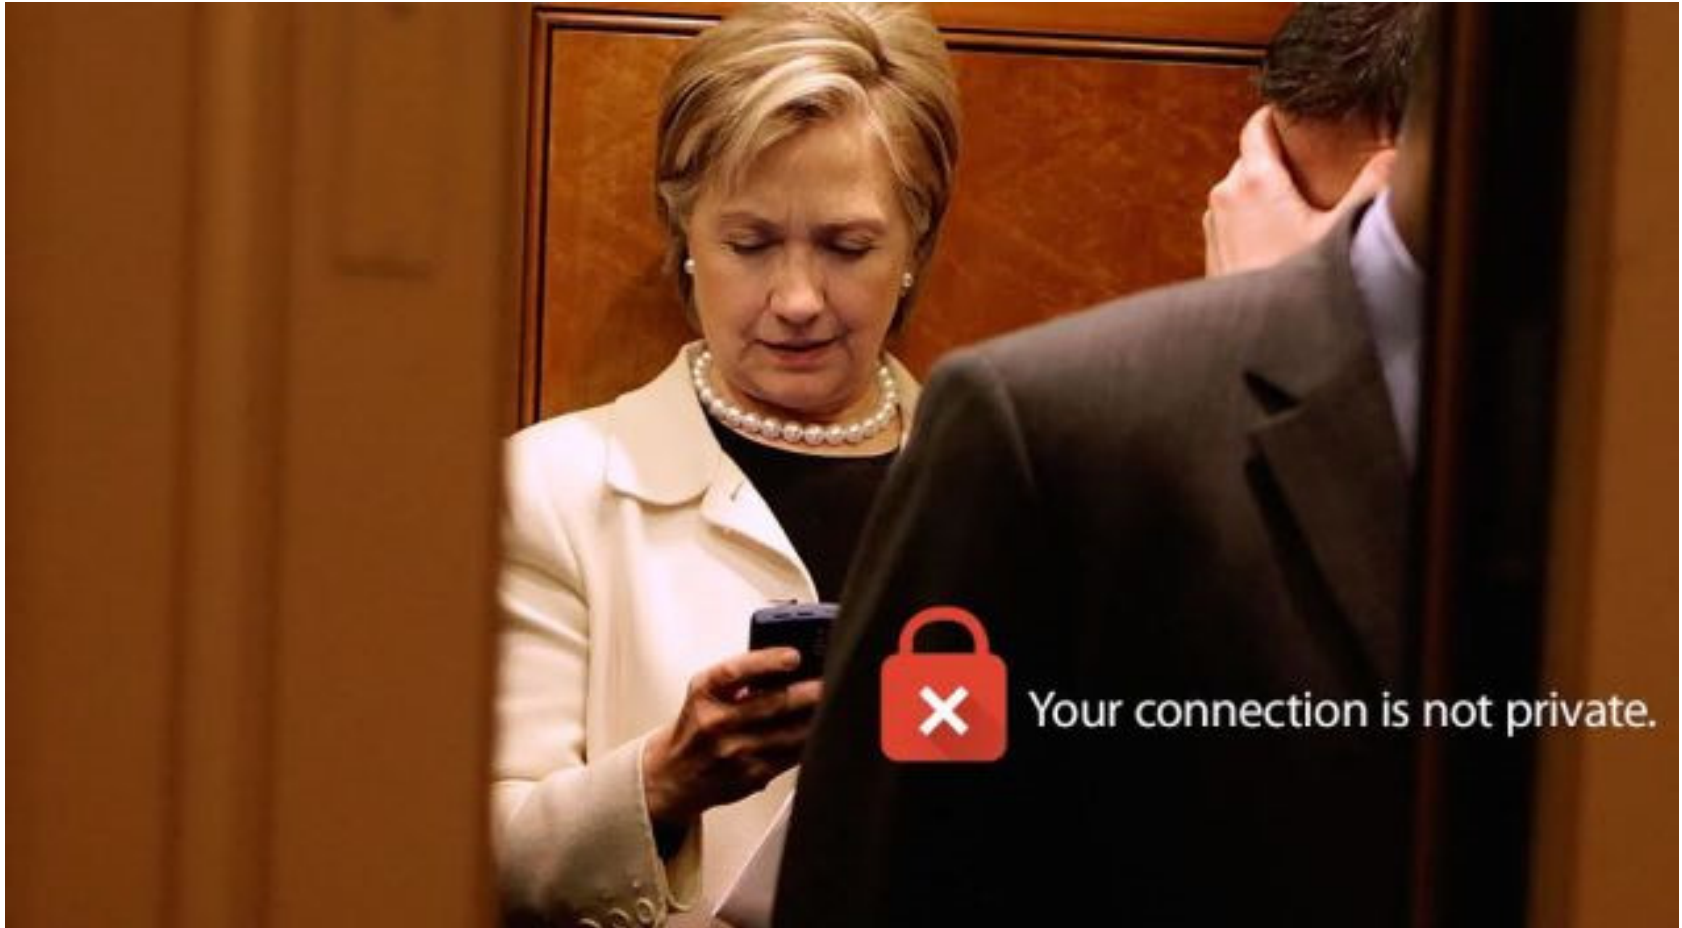

1. For access to the state collections
2. Scalable by developing digitale services to others

Project DUTO

Standards framework
for sustainable &
accessible digital
government information
(public sector)

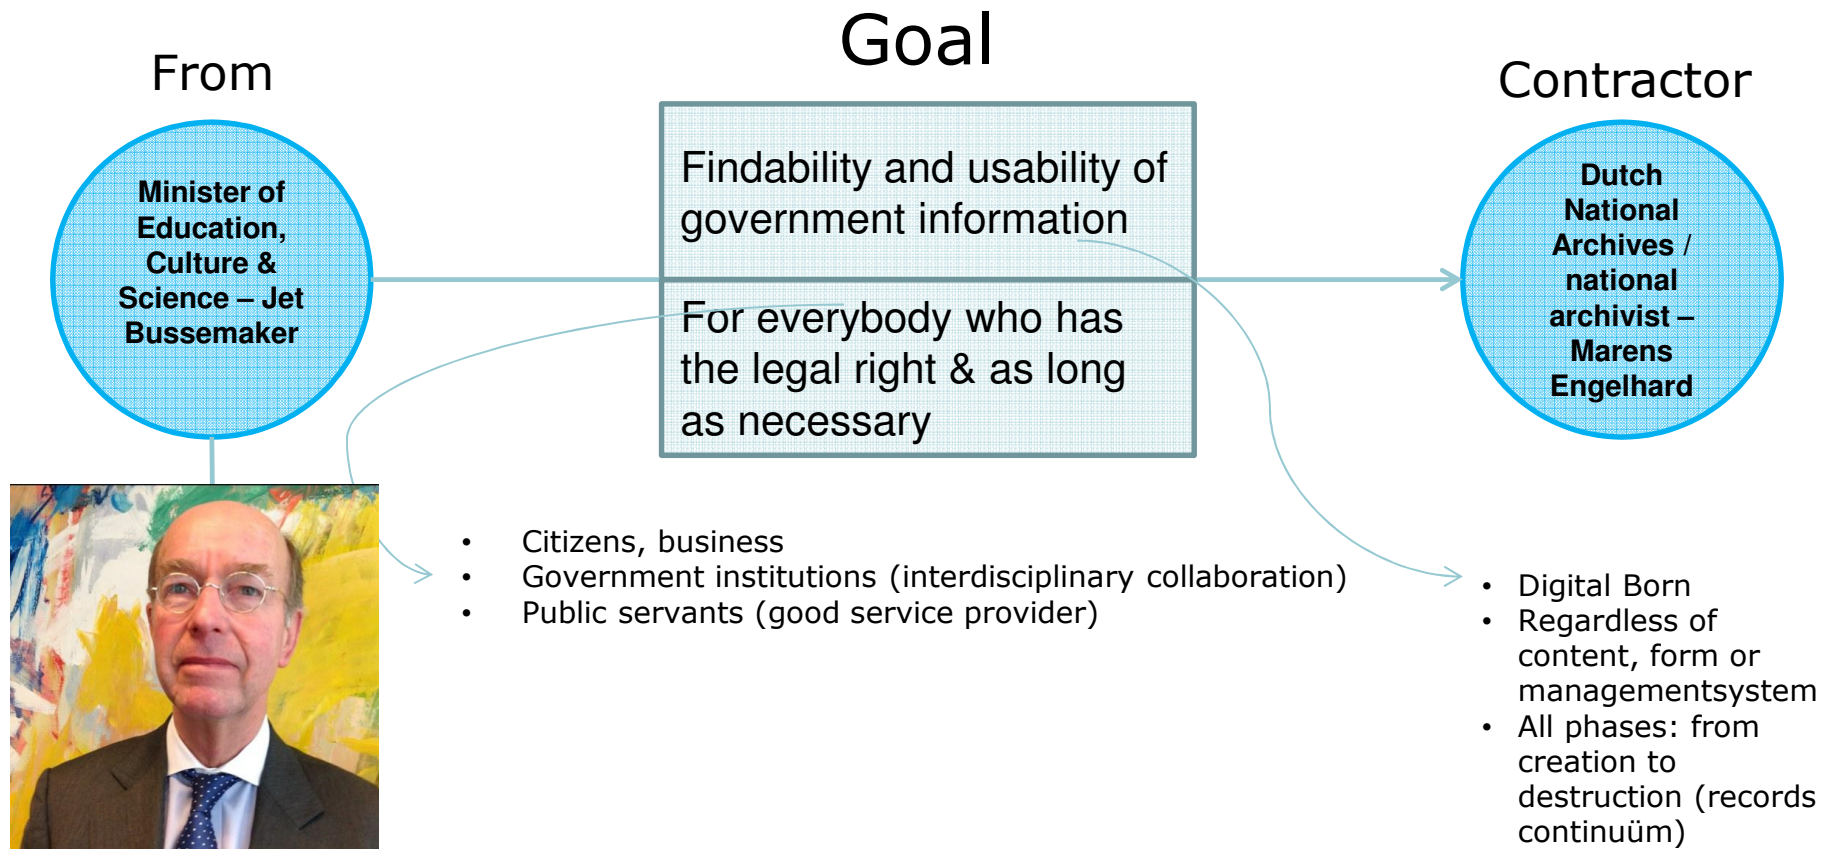

Your connection is not private.

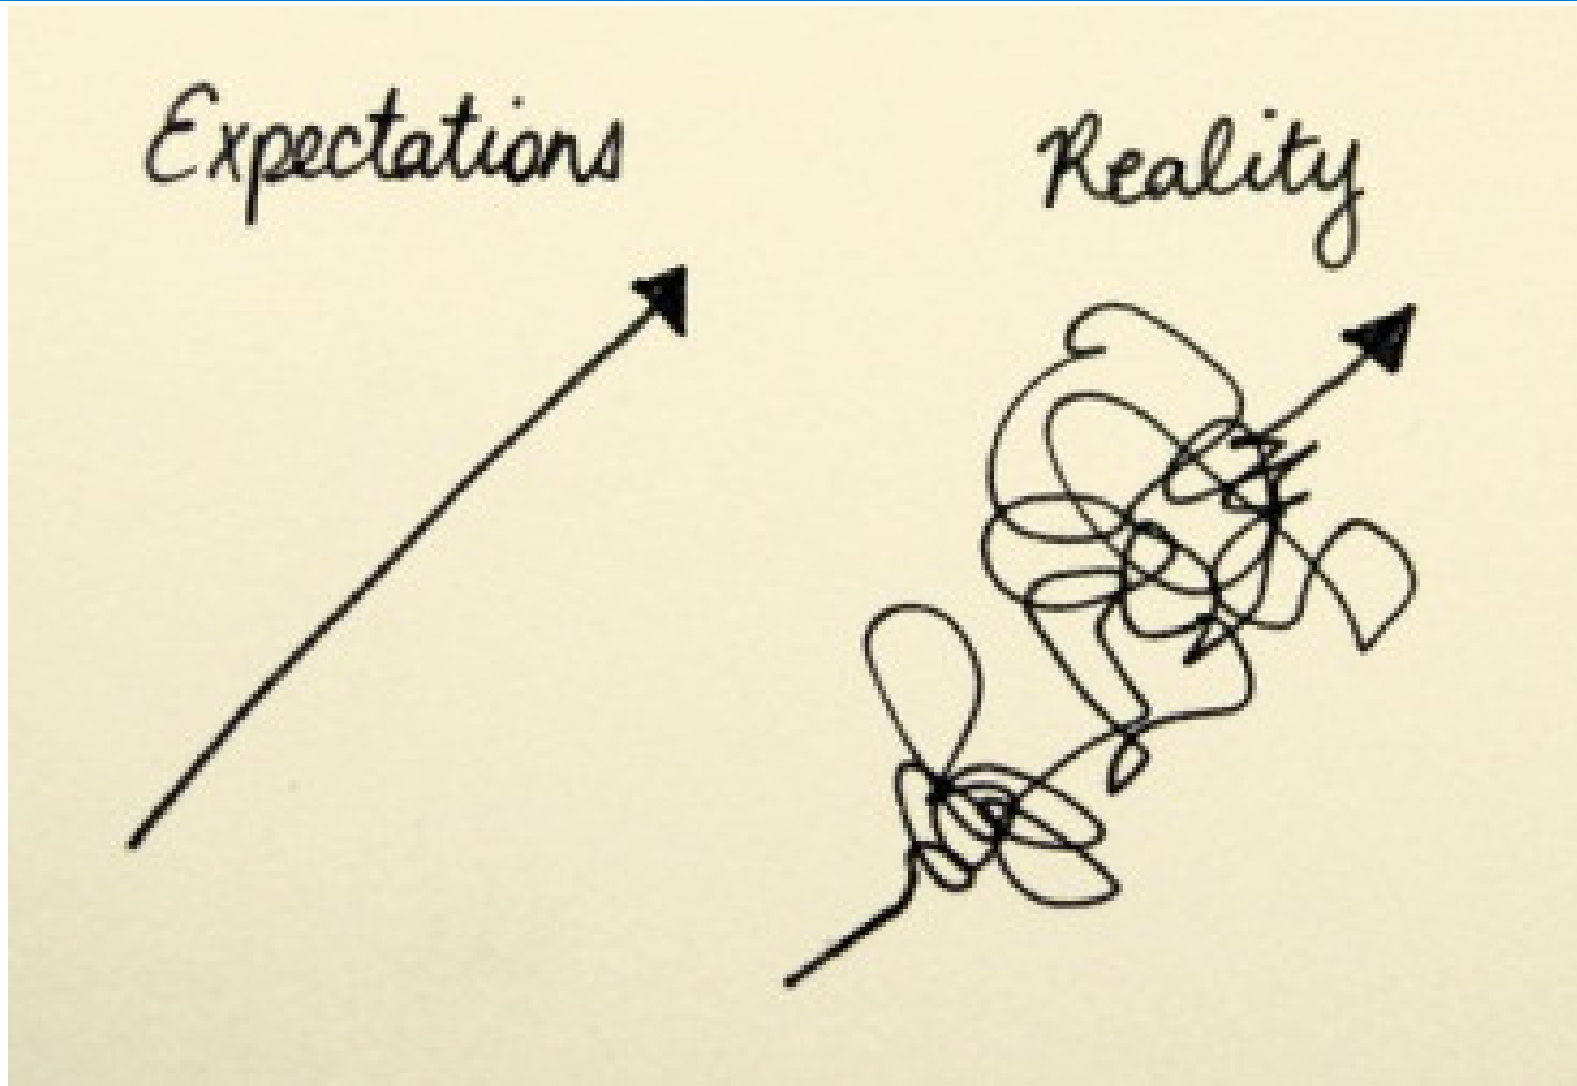

DTR Project DUTO

Setting the norm for sustainable and accessible government information

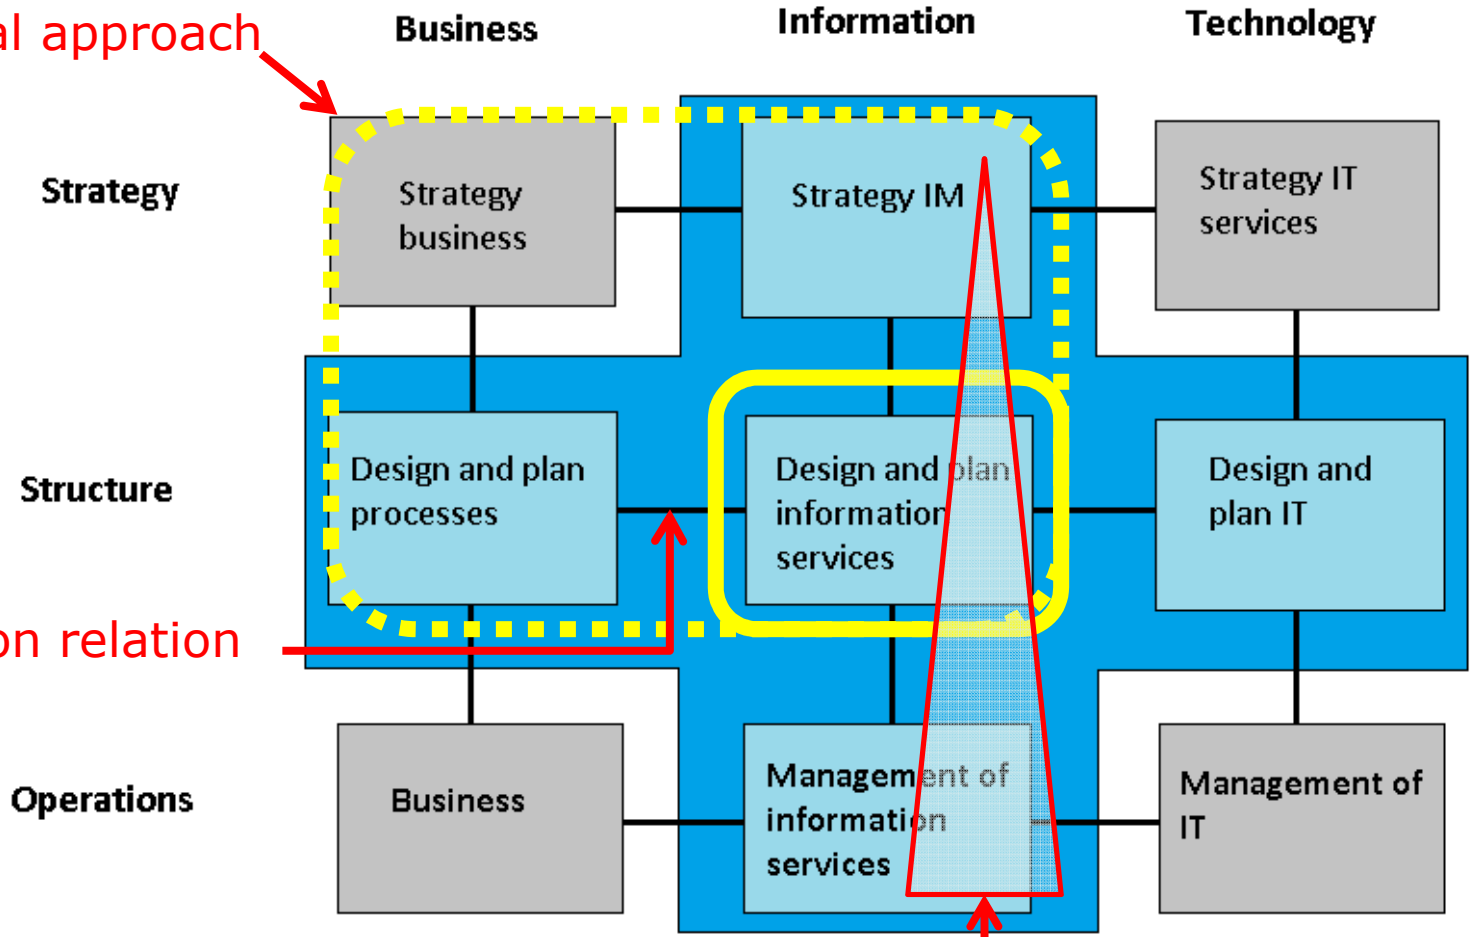

Basic principles - Public Sector Information...

1. ... is inventoried
2. ... is managed automatically
3. ... is provided with context information
4. ... is classified
5. ... is shared maximally
6. ... is findable
7. ... is available
8. ... is readable
9. ... is reliable
- 10.... has a retention period

Individual approach

Focus on relation

Isolated position of RM/ archives
